

## Parasoft Embedded showcases next-generation unit test framework and extended embedded platform support at Embedded World 2010, Nuremberg

### PRESS RELEASE

**Nuremberg, Germany (March 2-4, 2010) Booth# 11-202 - Parasoft Embedded**, leading provider of automated solutions that improve software quality and the development process for embedded and real time systems, announced today the new release of Parasoft C++test. The close partnership with ARM and Keil resulted in establishing dedicated target-to-host communication interface for quality tools. The new interface is available in Microcontroller Development Kit (MDK-ARM) used for Cortex-M MCUs with ARM CoreSight technology. C++test 7.3 is a first software-quality tool on the market ready to take advantage of the CoreSight™ debug and trace technology.

The latest release will be featured at Exhibitors' Forum, hall 11, 12.00-12.30 p.m., March 2, 2010.

#### **Delivering higher development efficiency, improved quality, and reduced time to market**

*"As the software components in embedded systems are becoming increasingly critical, the attention to quality in embedded software increases across the board. To address this challenge, our C++test aims to help development teams to realize code quality throughout the development lifecycle—using a synergy of time-proven techniques for early defect prevention, assisted by automation for implementation and monitoring"* stated Marek Kucharski, President of Parasoft Europe.

#### **About Parasoft Embedded**

Parasoft Embedded, a division of Parasoft Corporation, develops and markets embedded development tools and solutions that leverage proven software verification methods to achieve greater productivity, shorter time to market, and significantly fewer software defects. We help developers code smarter and test faster by capturing human intelligence and converting it into repeatable processes.

#### **About ARM Connected Community**

The ARM Connected Community is a global network of companies aligned to provide a complete solution, from design to manufacture and end use, for products based on the ARM architecture. ARM offers a variety of resources to Community members, including promotional programs and peer-networking opportunities that enable a variety of ARM Partners to come together to provide end-to-end customer solutions.

#### **About Keil Community**

Keil™, an ARM® Company, makes C compilers, macro assemblers, real-time kernels, debuggers, simulators, integrated environments, evaluation boards, and emulators for ARM7/ARM9/Cortex-M3, XC16x/C16x/ST10, 251, and 8051 MCU families.
